AI AGENT & AUTOMATION EXPERT

I'm a Computer Science student and AI automation enthusiast with hands-on experience in building intelligent workflows, chatbots, and full-stack tools. I specialize in using platforms like n8n, Gemini AI, and Voiceflow to automate business processes and enhance digital experiences. With a strong foundation in programming, APIs, and web development, I thrive on solving complex problems with elegant, automated solutions.

STRENGTHS AND EXPERTISE

AI Automation & Workflows

Chatbot Development

Full-Stack Web Development

PROFESSIONAL EXPERIENCE

Fiverr

January 2024 - Present

Ai Automation Expert

- Built MCP Server using n8n, Claude, Cursor, Airtable and Slack to turn natural language into tasks, updates, and Slack notifications.
- Developed AI voice Agent using Make and Retell AI.
- Automated lead capturing and validation with n8n, Sheets, Gmail, and Slack alerts.
- Developed AI voice appointment setter using Vapi, Make, ElevenLabs, and Google calendars.
- Summarized YouTube videos in Make, storing results in Google Docs and emailing updates.
- Created multi-stage RAG pipeline in Flowise with vector DB routing, grading, and fallback logic.
- Designed AI research agent using Serper API and Ollama for real-time, reliable insights.
- Built scraper & enrichment workflow using Gumloop, Apollo, SimilarWeb, and ChatGPT
- Developed a humorous AI chatbot with memory and file uploads using Flowise and Ollama
- Automated social media content creation and posting with Gemini, Sheets, and Make.com.
- Streamlined form response parsing and AI follow-ups using Google Forms, Sheets, and Gemini.
- Generated SEO blog posts from Sheets using Gemini and published to Docs via Make.com.
- Created AI email autoresponder with Gemini and Make for 24/7 smart replies.

Chatbot Developer

- Built custom chatbots using Voiceflow and Flowise for interactive user experiences.
- Developed RAG chatbot with n8n, Flowise, and Gemini for context-aware responses.
- Created multitasking chatbot that handles bookings, FAQs, and updates seamlessly.
- Built AI chat agent with Google Calendar sync for scheduling and smart interaction.
- Developed a personal AI chatbot for my portfolio using Zapier

Full Stack Web Developer

- Built a full stack issue tracker dashboard using Next.js, Prisma, Node.js, and SQL.
- Developed and deployed a personal portfolio using Next.js, React.js, Tailwind CSS, and Vercel.
- Created a social media app interface with real-time features using React.js, Firebase.
- Designed a data visualization dashboard using Python, Streamlit, Pandas, and Matplotlib.
- Made a weather web app using Next.js, OpenWeatherMap API, and Tailwind CSS.
- Developed a full-stack eCommerce website using React.js, Node.js, Express, and MongoDB.

EDUCATION

Computer Science Graduate

March 2021 - March 2025
