## AI AGENT & AUTOMATION EXPERT

I'm a Computer Science student and AI automation enthusiast with hands-on experience in building intelligent workflows, chatbots, and full-stack tools. I specialize in using platforms like n8n, Gemini AI, and Voiceflow to automate business processes and enhance digital experiences. With a strong foundation in programming, APIs, and web development, I thrive on solving complex problems with elegant, automated solutions.

## STRENGTHS AND EXPERTISE

AI Automation & Workflows

Chatbot Development

Full-Stack Web Development

## PROFESSIONAL EXPERIENCE

### Fiverr

January 2024 - Present

#### Ai Automation Expert

- Automated resume screening using n8n and Gemini for fast candidate evaluation.
- Scheduled social media posts via Make and Zapier from a single source.
- Managed YouTube uploads with n8n, automating video publishing and metadata.
- Created SEO blog workflows using n8n and WordPress API with AI-generated content.
- Built AI appointment setter using Flowsie, GHL, and Zapier for auto-booking calls.
- Developed email responder using Gumloop and Gmail API for smart replies.
- Scraped websites to Notion with n8n, storing structured web data automatically.
- Streamlined lead management using GHL, n8n, and Sheets for tracking and tagging.

#### Chatbot Developer

- Built custom chatbots using Voiceflow and Flowise for interactive user experiences.
- Developed RAG chatbot with n8n, Flowise, and Gemini for context-aware responses.
- Created multitasking chatbot that handles bookings, FAQs, and updates seamlessly.

#### Full Stack Web Developer

- Built a full stack issue tracker dashboard using Next.js, Prisma, Node.js, and SQL.
- Developed and deployed a personal portfolio using Next.js, React.js, Tailwind CSS, and Vercel.
- Created a social media app interface with real-time features using React.js, Firebase.
- Designed a data visualization dashboard using Python, Streamlit, Pandas, and Matplotlib.
- Made a weather web app using Next.js, OpenWeatherMap API, and Tailwind CSS.
- Developed a full-stack eCommerce website using React.js, Node.js, Express, and MongoDB.

## EDUCATION

Computer Science Graduate

March 2021 - March 2025
